Procurement shouldn't run on chasing emails

ProcureFlow replaces the manual grind with intelligent automation — while your team stays in control of every decision.

TODAY — MANUAL PROCUREMENT

- ✕ Hours spent searching for the right vendors
- ✕ RFQ emails written and sent one by one
- ✕ Quotes buried in inboxes, retyped into sheets
- ✕ Follow-ups forgotten, deals stuck on silence
- ✕ Deliveries slip with no warning or audit trail

WITH PROCUREFLOW

- ✓ Best-fit vendors matched and ranked instantly
- ✓ Professional RFQs generated and sent automatically
- ✓ AI reads replies and extracts quoted prices
- ✓ Automatic follow-ups; unresponsive vendors excluded
- ✓ Every PO, date, and decision tracked end to end

One workflow, from request to delivery

Upload what you need to buy — ProcureFlow handles everything in between.

1

Upload your list

Team uploads the items to purchase — that's the only manual step.

2

Smart vendor matching

Vendors ranked by category, approval status, brand fit, and rating.

3

Automated RFQs

Pre-filled quote requests dispatched; AI reads replies and follows up.

4

AI quote comparison

Weighted scoring on price and delivery, with clear AI-written reasoning.

5

Instant purchase order

You pick the winner — a formatted PO is generated and sent instantly.

6

Delivery tracking

Committed dates captured, reminders sent, overdue deliveries flagged.

Automation that never bypasses your team

The Decision Center

Anything that needs human judgement — a vendor changing a delivery date, an unresponsive supplier, an overdue shipment — lands in one queue.

You review the situation, **read an AI-drafted response, edit if needed, and send.**

Nothing reaches a vendor without your approval.

AI that reads your inbox

Quoted prices extracted from vendor replies — no retyping, no missed quotes.

Relentless follow-up

Silent vendors are chased automatically and excluded after repeated no-replies.

Explainable recommendations

Every ranking comes with AI-written reasoning you can show your auditors.

Proactive delivery alerts

Reminders the day before due dates; instant overdue flags when goods slip.

A procurement function that scales — without adding headcount

Faster cycles

From need identified to PO sent in a fraction of the time.

Better decisions

Transparent, data-backed vendor picks on every purchase.

Complete audit trail

Every quote, ranking, and approval recorded automatically.
